Wholesale specification & planning sheet

One cultivar. A Big Island origin.
Clear information for your next supply conversation.

LIVE RHIZOMES IN STOCK · 200 lb total.
Order by email: sales@redhawaiianturmeric.com. Powder is out of stock.

Identity	Hawaiian Red cultivar of *Curcuma longa*; live whole rhizomes and planned dried, ground powder.
Origin	Big Island, Hawaiʻi.
Growing status	Sustainable organic growing methods. **Not yet certified organic.** The first harvest is not offered as certified organic.
Annual capacity	16,000 lb of fresh turmeric. Capacity is not stock on hand, guaranteed yield, allocated supply, or finished powder weight.

Published product options

Form	Pack / minimum	Published price
Fresh wholesale	25 lb minimum	$20 / lb 25 lb = $500
Fresh retail	1 lb pack	$28 / pack
Powder retail	2 oz (56.7 g) pack	$24 / pack
Powder wholesale	To be confirmed	By inquiry

USD; shipping and any applicable tax are additional. A 25 lb order minimum does not establish a carton size. Wholesale case configuration, freight, destinations, dispatch dates, and order terms remain to be agreed.

This is a planning document, not a certificate of analysis, a quote, or an accepted order. Current information: redhawaiianturmeric.com/wholesale/

What is confirmed. What needs agreement.

Use this page to define your receiving specification. Pending fields are not product guarantees.

Topic	Current position / question to resolve
Harvest & dispatch	Live rhizomes: **200 lb total stock now**. Packing and dispatch within 24 hours; delivery estimated two business days after dispatch, subject to the destination and shipping terms. Wholesale freight and packing are confirmed by email.
Powder release	Release date: **not yet set**. Drying, milling, and final packaging details remain to be published.
Fresh grade & packing	Washing, trimming, size range, whole/broken pieces, surface-condition criteria, carton format, and handling instructions: **to be agreed**.
Powder specification	Intended ingredient: turmeric alone, without added color or fillers. Whole-root spice, not standardized curcumin extract. Particle size, moisture/water activity, treatment, packaging, and shelf-life basis: **to be confirmed**.
Laboratory reports	No laboratory results yet for the forthcoming crop. Tell us your required analytes, methods, units, reporting limits, and acceptance criteria. Any report must identify the material and lot it represents.
Traceability	Tell us your required harvest, packing, processing, and lot records. Final documentation package: **to be confirmed**.
Organic status	Not yet certified organic. If your program requires certified ingredients, flag that requirement before planning a purchase.

Capacity and conversion

Specify fresh purchased weight or finished powder weight. We have not published a farm-specific fresh-to-powder conversion. Fresh capacity cannot be treated as a commitment to the same weight of powder.

Receiving considerations

CTAHR identifies mechanical injury, dehydration, and fungal rot as key postharvest issues. Ask about the handling your route requires. FDA’s spice safety assessment explains why processing and microbial controls also matter for dried spices. No microbial treatment or ready-to-eat claim has been specified for our powder.

Plan your inquiry.

Order live rhizomes by email. We have 200 lb in total current stock. Send your desired quantity and delivery destination to sales@redhawaiianturmeric.com.

The planned October 11, 2027 crop is separate from this stock. Future crop pre-orders require eight months' notice; current in-stock orders do not. We confirm availability and shipping before an order is agreed.

Your buying brief	Notes to include in your inquiry
Business & use	Kitchen / food service / beverage / processor / retail / other: _____
Form & quantity	Fresh lb per delivery: _____ Powder lb per delivery: _____ One-time or recurring? _____
Timing	Earliest useful delivery: _____ Latest useful delivery: _____ Frequency / number of deliveries: _____
Destination	City, state or province, and country: _____
Required specifications	Pack format, grade, processing, tests, certifications, records: _____
